

BEST PLANNER DEVELOPMENT LTD.

Luxury Packaging Manufacturer

BEST PLANNER DEVELOPMENT LTD.

Innovative Packaging • Precision Printing • Global Standards

WHO WE ARE

BEST PLANNER DEVELOPMENT LTD. is a premier manufacturer of luxury packaging and high-quality printing solutions. Headquartered in Hong Kong, we operate two state-of-the-art facilities in Dongguan and Yangjiang, and are a trusted, long-standing partner to leading international brands.

WHY CHOOSE US

- ✓ Sustainably Made. Responsibly Manufactured
- ✓ Bringing Visionary Packaging Concepts to Life with Precision
- ✓ Proven Expertise in Premium Packaging and Trusted by World-Renowned Brands

WHY CHOOSE US

- ✓ Bespoke Design and Engineering Solutions That Elevate Brand Identity and Create Distinction
- ✓ End-to-End Solutions That Drive Success and Streamline Market Launch
- ✓ Dedicated to Driving Commercial Success for Our Clients

Hong Kong • Dongguan • Yangjiang • Canada

ABOUT

BEST PLANNER DEVELOPMENT LTD is a trusted global partner in premium packaging and high-quality printing solutions. Headquartered in Hong Kong, with advanced manufacturing facilities in Dongguan and Yangjiang, China, we deliver craftsmanship, innovation, and reliability at scale.

We specialize in creating distinctive, high-end packaging for world-class brands across cosmetics, wine & spirits, jewelry, watches, and specialty products. Our solutions are designed not only to protect products, but to elevate brand presence and enhance the customer experience.

As a true one-stop manufacturing partner, we manage every stage of the journey—from concept development and material sourcing to precision production, quality assurance, testing, and global logistics. This integrated approach ensures consistency, efficiency, and exceptional results.

Driven by value-added engineering and bespoke craftsmanship, we transform creative ideas into commercially successful, market-ready packaging that stands out in today's competitive landscape.

OUR TECHNOLOGY

Our engineering and development team possesses extensive expertise in structural design, backed by years of experience that enable us to meet our clients' requirements with precision.

Printing is the core process in our industry, and we continuously innovate to stay at the forefront of technology. Our team is highly skilled in managing the interactions between different types of paper and ink to ensure optimal quality.

Our post-printing capabilities cover a wide range of techniques, including hot stamping, texturing, lamination, embossing, and debossing. With the integration of advanced automation, our production process has become more efficient, stable, and faster than ever.

WHAT WE OFFER

One-Stop Manufacturing Services

- ✓ Product Design & Development
- ✓ Material Sourcing
- ✓ Precision Manufacturing
- ✓ Quality Assurance & Testing
- ✓ Global Logistics Management

Premium Packaging Solutions

- ✓ Cosmetics
- ✓ Wine & Spirits
- ✓ Jewelry & Watches
- ✓ Specialty Products

Our Future Vision & Advanced Manufacturing Facility

Strategic Expansion Plan

In late 2020, the company invested US \$22 million to acquire a new site in Yangjiang for the development of a state-of-the-art production facility. The new campus spans approximately 67,000 square meters—nearly three times the size of the original manufacturing plant.

Building Our Future:

Construction of the facility was completed in late 2025, and the plant is now fully operational. Designed with sustainability in mind, the facility integrates a wide range of environmental features and energy-efficient systems to minimize environmental impact. These initiatives not only support long-term sustainable development but also significantly enhance production capacity and strengthen the company's overall competitiveness.

Solar Power System

The facility is equipped with approximately 3,100 solar panels, covering an area of 10,000 m², forming a large-scale green energy supply system.

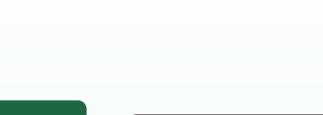

Annual Energy Savings

The solar system saves approximately 2 million kWh of electricity per year, significantly reducing traditional energy consumption and carbon emissions.

Liquid Waste Solidification & Treatment System

Through a liquid waste solidification system, approximately 20 tons of wastewater are treated and reused annually.

Liquid waste is processed using solidification and handed over to certified third-party companies for disposal.

Smart Warehouse System

Efficiency Enhancement: Automation and AMR robots significantly reduce material transportation, automated sorting, shelving, and significantly reduce manual handling time.

Data-Driven Inventory Management: RFID real-time tracking allows the system to automatically update inventory, achieving an accuracy rate of over 99%, minimizing stock-outs and overstocking.

Safety & Value Creation: Automation reduces the risk of accidents, and eliminates high-altitude manual work. Employees can focus on higher-value tasks such as monitoring and

Empowering Responsible Supply Chain

Best Planner is committed to using FSC® and Sedex® certified materials.
